13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

XTO Energy Inc. requests approval to downhole commingle production from the Kutz Fruitland Sand (79600) and the Fulcher Kutz Pictured Cliffs (77200). These pools are not included in the preapproved pool combinations; therefore, a form C107A has been included with this application.

Allocations are based upon a 9-section EUR and are calculated as follows:

Pictured Cliffs	Water	89%	Gas	89%	Oil	89%
Fruitland Sand	Water	11%	Gas	11%	Oil	11%

Ownership is common in both pools for this well with the WI, NRI & ORRI interest owners. Therefore, no notice has been sent of our application to DHC. Downhole commingling will offer an economical method of production while protecting against reservoir damage, waste of reserves & violation of correlative rights.
