13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Encana Oil & Gas (USA) Inc. (Encana) wishes to re-adjust the project area dedicated to the Lybrook H26-2307 02H well from 160 acres (S2N2 Sec. 26, T23N R7W) to 320 acres (N2 of Sec. 26, T23N R7W). Please see the following reasons for the re-adjustment to the 320 acre project area:

On September 26, 2012, Encana received BLM approval for the Application for Permit to Drill for the Lybrook H26-2307 02H well, with a 160 acre project area dedicated to the well.

Recently, the New Mexico Oil Conservation Division (OCD) has informed Encana of the applicability and interpretation of the Basin Mancos Gas Pool (Order Number 12984, Pool Code 97232), which applies to the Lybrook H26-2307 02H well. Therefore, Encana wishes to increase the project area for this well to 320 acres.

Furthermore, Encana will also file with the OCD a Non-Standard Location Application for the BHL for this well, and notify the appropriate parties. ✓
