13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once Testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Burlington completed the subject well Sept. 2012 and had to shut-in the well until the pipeline was built. We recently was able to connect this well to a pipeline, but because it had been shut-in, the well wouldn't flow because it produced too much water. Moved a rig in attempt to dry up the wellbore without luck. Well still making about 4-1/2 bbls/hr, too much to pump off. Isolated the water zone as the Upper Menefee perms @ 3928' - 4148'. Plans are to set a CIBP @ 4200' and a cement retainer @ 3880' and squeeze these perms so the well can be produced. Received verbal approval from Brandon Powell (OCD) and Troy Salyers (BLM) on 2/22/13.

Well will still be a MV/DK well since the Lower Menefee perms and Pt Lookout intervals are still open as is the Dakota.
