13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

A horizontal lateral is to be drilled southwest from the openhole in the same direction as the lateral that was drilled from San Isidro #15-7, which is S58 W. The objective is to intersect and produce from natural fractures in the Gallup sands that produced oil when the well was completed as a naturally flowing oil well. 70 Quality Foam will be used, which was the drilling fluid used to drill the lateral from San Isidro #15-7. No abnormal temperatures or pressures are anticipated. Work will commence as soon as Mr. Briggs' rig is moved in from Oklahoma City and he has crews to operate the rig.
