13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once Testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Burlington Resources will be conducting a pilot test on the subject well by installing an Advanced Burner combustor on this well pad. This pilot program will be a 2 well test to see if we can reduce our VOC emissions to comply with the new requirements being proposed by the EPA.

We will be adding this combustor to this well's facilities. See the attached drawing that indicates the placement of this piece of equipment. The dimensions of the combustor are approx. 24" in diameter by 14' tall and for safety reasons will need to be placed at a minimum of 35' from the tank.
