13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

LOGOS Operating, LLC proposes to install the following production facilities per the attached schematic.

- 3 - 400 Bbl Production Tanks
- 1 - 100 Bbl Re-circulation Tank
- 1 - 100 Bbl Pit
- 3-Phase Separator

RCVD MAR 28 '13
OIL CONS. DIV.
DIST. 3

LOGOS conducted an on-site with the BLM on 3/26/13 and adjusted the facilities to meet the requests of the BLM inspectors. The attached schematic includes the requested changes. LOGOS is requesting an exemption to the low profile requirements.

14. I, Kristy Graham, hereby certify that the foregoing is true and correct. Name (Printed/Typed)
Title: Production Engineer
Signature: *Kristy Graham*
Date: 03/26/2013

Road Access

Berm Dimensions		Tank Capacity		Tank Dimensions	
Length (ft)	110	Oil	400	12'x20'	
Width (ft)	45	Oil	400	12'x20'	
Height (ft)	2.5	Water	400	12'x20'	
Volume (BBLs)	2204	Pit	120		
Required Volume (BBLs)	1980	Total	1320		

Water Pit Settings

Set 2' below ground level

Separator

Base to be 1' above ground

Run 2" steel line to water pit

2" steel line from casing/tubing T to separator

Oil Tanks

Set at least 2' above ground level with tank rings and plastic liner
Plumb in both oil tanks to run through recirculation pump
Install equalizer line between both oil tanks
Plumb the inlet lines so that the separator can dump to either tank
Install drain line to water pit

Water Tanks

Install equalizing line to allow for skimming and overflow capacity.

Electric Access

Electric lines to be burried with trenched pipelines
Electric power sources to be gas proof and weather proof

Recirc Pump

Set on stand to allow for Y strainer to be drained to pit.
Hard plumb to low pressure inlet side of separator
Install hammer unions on each side of pump to allow for easy replacement.

Recirculation Oil Tank

100 BBL Tank.
Tie into the recirculation line.
