NATURE OF RELEASE

Type of Release: Condensate	Volume of Release: 33 BBL condensate & 11 BBL water	Volume Recovered: None
Source of Release: Production Tank	Date and Hour of Occurrence: Unknown	Date and Hour of Discovery: 3-27-2013
Was Immediate Notice Given? ☒ Yes ☐ No ☐ Not Required	If YES, To Whom? Brandon Powell, NMOCD and Mark Kelly, BLM	
By Whom? Logan Hixon	Date and Hour 3-28-2013	
Was a Watercourse Reached? ☐ Yes ☒ No	If YES, Volume Impacting the Watercourse.	
If a Watercourse was Impacted, Describe Fully.*		

Describe Cause of Problem and Remedial Action Taken.* On 3/27/2013 an XTO Automation tech was testing alarms on the Hubbell GC C # 1E and noticed a stain around the bottom of the 300 barrel oil tank. A small corrosion hole was found in a weld at the bottom of the tank. The tank was gauged and confirmed the loss of 11 barrels of water and 33 barrels of oil released inside of the tank berm. The site was then ranked according to the NMOCD Guidelines for the Remediation of Leaks, Spills and Releases. The site was ranked a 10 due to an estimated depth to groundwater of greater than 100 feet, distance to a water well greater than 1000 feet, and distance to a secondary tributary of the Kutz Canyon Wash of 200'-1000'. This set the closure standard to 1000 ppm TPH, 10 ppm benzene, and 50 ppm total BTEX.

Describe Area Affected and Cleanup Action Taken.* A one call was made and excavation began to remove impacted soils. Composite samples were collected from all four walls and the bottom. The walls were below standards but the bottom results were still above standards. The excavation continued until the final extent of the excavation was approximately 27'x21'x28' deep. A total of approximately 550 yards of impacted soil was hauled to Envirotech land farm, and the clean material was hauled in from Four Corners Material. A composite sample was collected from the bottom and returned results below the standards. No further action is required regarding this incident.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
