13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Logos Operating, LLC proposes to tie-in the Logos #5 to the Elm Ridge (Beeline) system per the attached plat. The proposed tie-in plan is based on the onsite and meetings with the BLM so that this tie-in does not create new disturbance. The tie-in will be entirely contained within the lease boundaries and will also be contained entirely within the location/access road so that no new disturbance is created. The line will be owned by Logos Operating all the way to the custody transfer meter which will be set at the tie-in point to the Elm Ridge (Beeline) system. The Elm Ridge (Beeline) gas line crosses directly underneath the access road to the Logos #5 location.

The line will be constructed out of 3" steel and will be buried ~4' deep. This tie-in will allow Logos to market the gas and eliminate the need for flaring.
