NATURE OF RELEASE

Type of Release: Condensate and produced water	Volume of Release: 7 bbl water/2 bbl condensate	Volume Recovered: None
Source of Release: block valve on drain line to BGT	Date and Hour of Occurrence: 5/18/13-1:30 PM	Date and Hour of Discovery: 5/18/2013 1:30 PM
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour:	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.

OIL CONS. DIV.
DIST. 3

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

Contract gauger noticed a drip coming from the block valve on the drain line from the condensate tank to the BGT. When the gauger attempted to tighten the bolts on the valve the bonnet cracked, releasing condensate and water from the tank. The gauger opened the downstream ball valve to direct the condensate and water flow to the BGT and minimize the amount that was released to the bermed area around the condensate tank. The remaining condensate in the tank was pulled. The valve was replaced and the recovered condensate was placed back in the tank.

Describe Area Affected and Cleanup Action Taken.*

The condensate and water was confined to the bermed area around the tank, and to the BGT to which it was diverted. Condensate in the BGT was removed and placed back into the condensate tank after the valve was replaced. Based on tank gauge data before and after the release it is estimated 7 bbl of water and 2 bbl of condensate were released to the bermed area around the condensate tank. Impacted soil was raked and covered with clean sand.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
