13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

This well was approved by the BLM to be Temporarily Abandoned until July 15, 2014.

When preparing to perform a Mechanical Integrity Test (MIT) as required by the NMOCD, it was determined that there is a hole in the casing at approximately 380'. Top of cement in the 7" casing is at the surface. We intend to repair the hole in the casing by cement squeeze with approximately 50 sax of Class B cement, and then perform the MIT. Verbal approval was obtained from Troy Salyers, engineer at the BLM in Farmington, NM and also Brandon Powell, Inspection and Enforcement Supervisor of the NMOCD Aztec, NM Office, on September 18, 2013.

Notify NMOCD 24 hrs  
prior to beginning  
operations
