12. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompilation.

BP America Production Company request permission to surface commingle production from the Basin Dakota, Blanco Mesaverde and Basin Fruitland Pools from our McCulley LS 5N & 5S wells. Surface commingling Basin Dk, Blanco Mesaverde production will consist of the McCulley LS 5N API 30-045-32306 and Basin Fruitland Coal production will be from the McCulley LS 5S API 30-045-32307. The production from each well will be metered prior to commingling then the commingled production will flow into through the separator where the liquids will be removed. The commingled gas will then be sent through compression prior to entering the sales meter. Please reference the attached schematics reflecting the Proposed Surface Commingling Layout provided for your reference.

All interest owners are the same in both the DK, MV & FC. Commingling of production is to reduce operating expenses between the wells and will result in increased economic life of the wells. All piping & equipment will be on the existing well pad.

BLM has also been notified of this proposal by copy of BLM Form 3160-5.

PC 1152
