1	NOR	THWEST NEWMEXICO) PACKER LEAKAGI	E TEST INSTRUCTI	ONS			
1. A packer leakage test shall be com completion of the well, and annually the						k was indicated during Flow Test No. 1. Procedure except that the previously produced zone shall		
Such tests shall also be commenced on chemical or fracture treatment, and when	all multiple completions within seven d mever remedial work has been done on	ays following recompletion as a well during which the pack	nd/or remain shut er or		was previously shut-in is			
the tubing have been disturbed. Tests s requested by the Division.	hall also be taken at any time that com	nunication is suspected or wh	7. Pressu			zone with a deadweight pressure gauge at time eginning of each flow period, at fifteen-minute		
2. At least 72 hours prior to the com	mencement of any packer leakage test,	the operator shall notify the	intervals du	ring the first hour thereo	f, and at hourly intervals	thereafter, including one pressure measurement ay tests: immediately prior to the beginning of each		
Division in writing of the exact time the			to the conc	lusion of each flow perio	d. Other pressures may be a series of the series of th	proximately the midway point) and immediately prior be taken as desired, or may be requested on wells		
3 The nacker leakage test shall com	mence when both zones of the dual con	nnlation are chut-in for pressu	24-ho		sures, throughout the ent	ire test, shall be continuously measured and recorded be checked at least twice, once at the beginning and		
3. The packer leakage test shall commence when both zones of the dual completion are shut-in for pressure stabilization. Both zones shall remain shut-in until the well-head pressure in each has stabilized, provided however, that they need not remain shut-in more than seven days.				once at the end of each test, with a deadweight pressure gauge. If a well is a gas-oil or an oil-gas dual completion, the recording gauge shall be required on the oil zone only, with deadweight pressures as required				
1 4 For Flow That Mark 1 and	the dual completion about the second second	at the norm-1-rate of the 1-rd		g taken on the gas zone.				
4. For Flow Test No. 1, one zone of while the other zone remains shut-in. S 24 hours in the case of an oil well. Not	uch test shall be continued for seven d	ays in the case of a gas well ar	nd for	esults of the above-descri	bed tests shall be filed in	triplicate within 15 days after completion of the		
atmosphere due to lack of a pipeline co			test. Tests Northwest	shall be filed with the Az New Mexico Packer Lea	ttec District Office of the kage Test Form Revised	New Mexico Oil Conservation Division on 10-01-78 with all deadweight pressures indicated		
	st No. 1, the well shall again be shut-in.	in accordance with Paragraph		wen as the nowing temp	eratures (gas zones only)	and gravity and GOR (oil zones only).
