API# 30-039-27311

Mr. Perrin:

Energen Resources finished a pay add and down hole commingling operations on the subject well, in accordance with the approved Notice of Intent.

Prior to commingling operations, the Blanco-Mesaverde was producing at a stabilized rate of about 36 MCFPD and less than ¼ BOPD. The Gavilan PC was added in August 2013. The well has stabilized at a rate of about 174 MCPD and about 1/2 BOPD. The following allocation is recommended (see attached production plot):

| | <u>Gas</u> | <u>Oil</u> |
|------------------|------------|------------|
| Blanco-Mesaverde | 19% | 25% |
| Gavilan PC | 81% | 75% |

If additional information is needed, please contact me at 505-325-6800.

Sincerely,

Adam Klem
District Engineer
