RCVD FEB 12 '14  
OIL CONS. DIV.  
DIST. 3

**Describe Cause of Problem and Remedial Action Taken.\*** Due to miscommunication with the water trucking company, the produced water overflowed the storage tank into a lined berm. All fluids were contained in the lined berm. No fluid contacted the soil.

**Describe Area Affected and Cleanup Action Taken.\*** The liquids were pulled from the lined berm using a water truck. All released fluids were recovered and properly disposed.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
