If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

A 1" valve was partially opened by livestock. The line which the valve is located on is used to blow liquids into a downstream produced water tank. Personnel closed the valve and secured the release. A total of 170 MCF of natural gas was released.

Describe Area Affected and Cleanup Action Taken.\*

No clean-up required for natural gas release.

**OIL CONS. DIV DIST. 3**

**MAY 21 2014**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
