13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Expected time frame to remediate has been delayed due to encountering excessive oil staining on soil underground around old flow line and an unexpected waste pit. These deposits precede Dominion Production Company, LLC time as operator and either were unreported or if reported uncorrected and basically covered over by previous operators. We have encountered 3 dresser patches on this old flow line so obviously the problem had existed for some time. This pipeline has never been used by Dominion nor attached to the well bore nor were we aware of its existence. We have also encountered an unreported wellhead next to the 1-X (we assume the original SH-1).

We expect this well will be tested satisfactorily by week ending 22nd June, 2014. As a result of these delays the time frame for the remaining well sites will be pushed backwards accordingly. Dominion hopes to recover the lost time on well sites that may require less remediation.

BLM'S APPROVAL OR ACCEPTANCE OF THIS ACTION DOES NOT RELIEVE THE LESSEE AND OPERATOR FROM OBTAINING ANY OTHER AUTHORIZATION REQUIRED FOR OPERATIONS ON FEDERAL AND INDIAN LANDS

Submit test results to this office.
