DEC 04 2014

Chaco Trunk 4-2 CDP, Sec 12, T23N, R07W

D. Distance BUILT Estimated cost of connection \_\_\_\_\_

E. This exception is requested for the following reasons: WPX Energy requests authorization to flare this well due to an expected spike in nitrogen content above acceptable Enterprise pipeline standards due to nearby frac activity on the NE CHACO COM #201H, NE CHACO COM #202H, and NE CHACO COM #270H. As a result, WPX Energy is anticipating that the NE CHACO COM #204H may experience crossflow. If a crossflow event on the well results in nitrogen content above Enterprise pipeline standards, flaring may begin as soon as 12/9/14 given approval. The well would flare for up to 30 days. Pipeline quality gas should be obtained within 30 days. A gas sample will be collected upon the confirmation of crossflow and sent to a third party for a gas analysis. The results of the gas analysis will be submitted upon receipt.
