## APPLICATION FOR EXCEPTION TO NO-FLARE RULE 19.15.18.12

(See Rule 19.15.18.12 NMAC and Rule 19.15.7.37 NMAC)

A. Applicant: WPX Energy Production, LLC

whose address is: P.O. Box 640, Aztec, NM 87410,

hereby requests an exception to Rule 19.15.18.12 until 2/22/15, for the following described tank battery (or LACT):

Name of Lease: NE CHACO COM #182H API-30-039-31212 Name of Pool: Chaco Unit NE HZ (Oil)

Location of Battery: Unit Letter L Section 07 Township 23N Range 6W

Number of wells producing into battery 3

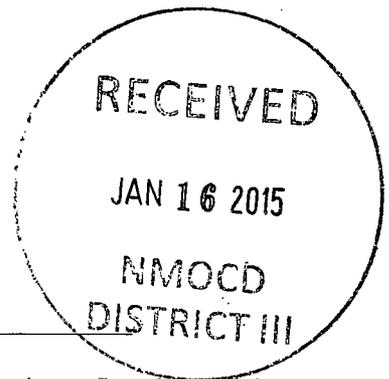

B. Based upon oil production of 200 barrels per day, the estimated volume of gas to be flared is 1600 MCF/D; Value: \$4800 per day.

C. Name and location of nearest gas gathering facility:

Williams Field Service, Sec 12, T23N, R07W

D. Distance BUILT Estimated cost of connection \_\_\_\_\_

E. This exception is requested for the following reasons: WPX Energy requests authorization to flare this well due to a high nitrogen content above acceptable Williams Field Service pipeline standards due to nearby frac activity on the NE CHACO COM #199H, NE CHACO COM #200H, NE CHACO COM #268H, and NE CHACO COM #269H scheduled to occur on 1/23/15. As a result, WPX Energy is anticipating that the NE CHACO COM #182H may experience crossflow. If the well experiences crossflow from the stimulation activity, a gas sample will be collected and sent to a third party for a gas analysis to determine the nitrogen content of the well. If the well needs to flare, the results of the gas analysis will be submitted upon receipt. The well could flare for up to 30 days if given approval. Pipeline quality gas should be obtained within 30 days of flaring. If the well does not need to flare within the time of approval, a sundry will be written to clarify that WPX did not need to flare the well.
