13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof.

If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once Testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

During the rig work to determine reason for BH pressure during last required BH test, Burlington Resources set RBP @ 6508' (50' above DK perfs) and PT casing to 560#/30 min. Bled off 5# in 30/min. Good test. Ran CBL and showed TOC @ 1050' and showed gas zones adequately covered with cement. Had BH SI pressure of 165# on 2/18 before work; 2/19 @ 4# SI pressure and then on 2/20 had 8# with RBP @ 6508' in place. Burlington wanted to MO rig and monitor BH since we proved the casing integrity. Plans are to put a new WH on well so they will have a method to test the WH seals. Verbal approval was given by Troy Salyers (BLM) and Brandon Powell (OCD). Will do a subsequent report of work preformed and then report SI BH pressure @ 2/25 and again @ 4/25 and report to OCD.
