FRUITLAND COAL	71 MCF	81%		100%																						
	88																									
JUSTIFICATION OF ALLOCATION: ConocoPhillips requests that production for the down hole commingle to be switched to a fixed percentage based allocation. The fixed percentage based allocation is calculated from average production rates from twelve months. There was no previous condensate production from the Pictured Cliffs therefore 100% condensate will be allocated to the Fruitland Coal. <i>**This is a revised allocation to change the fixed allocation date to match the end of the subtraction allocation period. The allocation percentages for the period of 4/1/2013 until 6/26/2013 will be resubmitted to reflect the fixed allocation percentages.**</i>
