Release Notification and Corrective Action

OPERATOR

Initial Report Final Report

Name of Company: D.J. Simmons	Contact: John Byrom
Address: 1009 Ridgeway Place, Suite 200, 87401	Telephone No.: 505-326-3753
Facility Name: Simmons #12	Facility Type: PC Gas Well
Surface Owner: Federal	Mineral Owner: Federal
API No. 30-045118700000	

LOCATION OF RELEASE

Unit Letter O	Section 29	Township 29N	Range 9W	Feet from the 1070	North/South Line FSL	Feet from the 1630	East/West Line FEL	County San Juan, NM
------------------	---------------	-----------------	-------------	-----------------------	-------------------------	-----------------------	-----------------------	------------------------

Latitude 36.692462 Longitude -107.800247

NATURE OF RELEASE

Type of Release: Historic condensate/produced water	Volume of Release: Estimated at less than 25 bbls	Volume Recovered: 0 bbls
Source of Release: Separation drip	Date and Hour of Occurrence: Unk	Date and Hour of Discovery: 6/3/2015 10:30 AM
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Brandon Powell and Cory Smith	
By Whom? Peter Diethrich (Tegre Corporation)	Date and Hour: 6/4/2015, 10:00 AM	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

OIL CONS. DIV DIST. 3

If a Watercourse was Impacted, Describe Fully.*

NA

JUL 27 2015

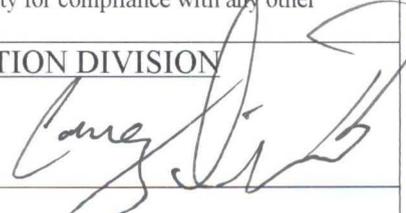

Describe Cause of Problem and Remedial Action Taken.*

Removal of BGT soil samples indicated a historic release of condensate. Soil samples were taken to a depth of 36" and lab results indicated soils with elevated levels of TPH (418.1). Soils with elevated levels of TPH were excavated and disposed of at IEI (Aztec, NM). Limits from the NMOCD Guidelines for the Remediation of Leaks, Spills and Releases document were utilized in identifying elevated TPH in soils. Finals labs and a sketch indicating where soil samples were taken from are attached.

Describe Area Affected and Cleanup Action Taken.*

An estimated 567 cubic yards of elevated TPH soil was removed from the project area. The floors and walls of the remediation area were sprayed with 7.5 lbs of Potassium Permanganate mixed into 150 gallons of water prior to backfilling. Clean, weed-free, fill material from a BLM-authorized offsite location was brought in to backfill and close the remediation area. The area was graded to flow away from the cleanup site. Reclamation and re-seeding of the affected area is projected to begin July 30, 2015.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

All accredited analytes contained in this report are denoted by an asterisk (*). For a complete list of accredited analytes please do not hesitate to contact us via any of the contact information contained in this report. All of our certifications can be viewed at <http://greenanalytical.com/certifications/>

Green Analytical Laboratories is NELAP accredited through the Texas Commission on Environmental Quality. Accreditation applies to drinking water and non-potable water matrices for trace metals and a variety of inorganic parameters. Green Analytical Laboratories is also accredited through the Colorado Department of Public Health and Environment and EPA region 8 for trace metals, Cyanide, Fluoride, Nitrate, and Nitrite in drinking water.

Our affiliate laboratory, Cardinal Laboratories, is also NELAP accredited through the Texas Commission on Environmental Quality for a variety of organic constituents in drinking water, non-potable water and solid matrices. Cardinal is also accredited for regulated VOCs, TTHM, and HAA-5 in drinking water.
