13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

M&M Production & Operation, Inc. has been producing the Anderson #1. It has not made any oil but the gas production on this well has been substantial enough to continue gas production. The gas is collected through an off lease CDP meter. Beeline Transportation collects the gas, markets, and sales the gas for our company. The electronically filed OGOR production report will indicate the amount of gas production on this well. We report the royalties under the Anderson #2 lease. Per the request of the Minerals Management Service. We are consulting with engineers on how to bring the oil production back and decrease the amount of water production. But have not come up with a decision at this time.
