workover, Emed.			•	<u> 16/16/50</u> 00000	
Burlington Resources proposes to construct a workover pit. Based on Burlington's interpretation of the Ecosphere's risk ranking criteria, the					
workover pit will be a lined pit as detailed in Burlington's Revised Drilling / Workover Pit Construction / Operation Procedures dated November					
11, 2004 on file at the NMOCD office. Burlington Resources anticipates closing the pit according to the Drilling / Workover Pit Closure Procedure dated August 2, 2004 on file at the NMOCD office.					
dated August 2, 2004 on the at t	the MMOCD office.				
On this workover, a vent/flare pit may be the only pit that will be required. Under this circumstance, a portion of this vent/flare pit will be					
designed to manage fluids, and that portion will be lined, as per the risk ranking criteria.					
Thomby contifue that the information	- ab in to an all1.				
I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines, a general permit X or an (attached) alternative OCD-approved plan.
