Memo

To: Denny Foutz
From: Tweeti Blancett
November 4, 2005
Re: Payne 221 S

Denny thank you for your attention to the Payne 221 S when we called.

I was not surprised the pit was contaminated and very disappointed that the pit contaminates were mixed with the clean soil just above our irrigation air box and fresh water spring.

I would request the following:

1. Copy of all the test samples taken from the Payne 221 S well
2. Remediation plan for the contaminates that were mixed into the soil
3. Testing of the natural spring below the pit
4. Testing of points along the arroyo for migration of contamination

Thank you,

Tweeti Blancett
