☒ Other CBL Log -

TOC @ Surface

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompletable horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletable in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Lance Oil & Gas Company, Inc has run a CBL on the NV Patricia 26 #2 well pursuant to the BLM request on previously approved sundry reporting the "Spud & Csg" accepted for record dated 01/12/06.

The CBL was run by BlueJet on Friday afternoon, 02/03/06. TOC is identified at surface with poor bond between ~40' KB to 170' KB. TOC appears to be at the bottom of the 8-5/8" surface casing. The rest of the well bore has an excellent bond.

TOC ~ 180'
