13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.

BP America Production Company request permission to surface commingle production the Blanco Mesaverde and Pictured Cliffs Pools from our Atlantic A LS Wells No. 1A & 17. Surface commingling Blanco Mesaverde production will consist of well No. 1A, API No. 30-045-22880 and Pictured Cliffs production will be from well No. 17, API 30-045-23280. The production from each well will be metered prior to commingling then the commingled production will flow into through the separator where the liquids will be removed. The commingled gas will then be sent through compression prior to entering the sales meter. Please reference the attached schematics reflecting the Proposed Surface Commingling Layout provided for your reference.

All interest owners are identical between these Pools, therefore, no additional notification is required prior to surface commingling approval.

Commingling of production is to reduce operating expenses between the wells and will result in increased economic life of the wells.

No additional surface disturbance will result from surface commingling of the subject wells.
