Describe Cause of Problem and Remedial Action Taken.*
During a routine tank gauging it was discovered that the Oil Production Tank released approximately 81.77 bbls Condensate and 9.2 bbls of Produced Water into the ground (suspected corrosion in tank bottom). No staining or fluid was visible on the surface, and no fluid was recovered. The release was contained below surface presumably within the berm, and did not leave location

Describe Area Affected and Cleanup Action Taken.*
ConocoPhillips will assess the soil to determine a path forward for clean-up if necessary.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
