Historic contamination discovered during P&A activities.

MAY 18 2016

Describe Area Affected and Cleanup Action Taken.\*

- Historic contamination discovered below the former production tank.
- Impacted soils were removed and disposed of at landfarm.
- Following removal of soils, confirmation soils will be collected from within the excavation and laboratory analyzed for BTEX and TPH (GRO/DRO). Results will be included in Final C-141.
- Additional cleanup actions will be taken if analytical laboratory results exceed NMOCD action levels based on site ranking.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
