13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 must be filed once Testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

In order to adequately monitor the bradenhead pressure, NMOCD requested that the surface casing be capped and a bradenhead valve installed. A 1/4" plate was custom cut and welded from the top of the surface casing to the intermediate casing. A pipe and valve was then plumbed to the surface to facilitate bradenhead testing. Attached is a picture and current wellbore schematic.
