Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

BIYA Operators Inc. respectfully requests permission to build a tank battery at the HGU 157 Well. BIYA Operators would like to eliminate the long flow line from the HGU 157 to the main B battery manifold and to the HGU A battery in section 34. This will reduce the possibility of line leaks. This Tank battery will be built per our SPCC requirements and we will use Best Management Practices. We will lay a layer of base at the site, laydown a 30 mil liner on base. A layer of gravel will be laid on top of liner. We will set a 300 barrel oil tank and a 210 barrel water tank on the gravel. Either a steel containment berm or an earthen containment berm will be constructed around the tanks and will be built to hold 125% of the largest tanks' volume which is the 300 Bbl oil tank.
