Describe Cause of Problem and Remedial Action Taken.*

OCD inspector notified Chevron of stains around the pit tank that needed to be cleaned up. Cleanup of the contaminated soil started on 8/25/16. During cleanup of the stain historical contamination was found, action was then taken to continue digging until visual signs of the historical contamination were removed.

Describe Area Affected and Cleanup Action Taken.*

The affected area was inside the secondary containment beneath the pit tank. Contaminated soil was removed and hauled to the Envirotech land farm for remediation. On Nov 2, 2016 a sample was taken (witnessed by OCD inspector) and analyzed at Envirotech lab confirming TPH below threshold (report attached).

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
