NATURE OF RELEASE

Type of Release Leaking injector	Volume of Release 2 gallons	Volume Recovered 2 gallons
Source of Release Methanol injector on pipeline	Date and Hour of Occurrence Unknown	Date and Hour of Discovery 6-28-17 4:12 pm
Was Immediate Notice Given? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	
By Whom? Brandon Foley, State Land Office	Date and Hour 6-28-17 at 4:12PM	
Was a Watercourse Reached? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	If YES, Volume Impacting the Watercourse. This was a slow drip. It was compacted. 2 Gallons of compacted oil with sand.	

If a Watercourse was Impacted, Describe Fully.*

The valve for the methanol injector, that is used to defrost the pipeline when needed, is located in the wash. It was leaking a small drip of oil slowly. There was no evidence that it made it down the wash.

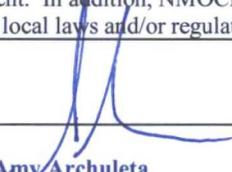

Describe Cause of Problem and Remedial Action Taken.*

Brandon Foley with the State Land Office notified me and the OCD by email on 6-28-17. We immediately went out and dug up the contaminated soil and exposed the pipeline. The valve on the methanol injector was leaking a small drop of oil very slowly. It accumulated approximately 2 gallons of oil that when mixed with the sand hardened.

Describe Area Affected and Cleanup Action Taken.*

It appears only the immediate area was affected and we immediately dug out the contamination and left the pipeline exposed. The hole that was dug is approximately 2'x 2' and 1' deep. The contamination wasn't that deep, we exposed to pipeline to ensure that the pipeline was not leaking. We will sample the soil and backfill the hole.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
