13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomplate in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

BIYA Operators, Inc. respectfully requests permission to shut this well in for the winter. This well makes some water and the existing flow-line is 1 mile away from the tank battery. We would like to shut this well in in order to alleviate the potential for a flow-line freeze. We anticipate removing the flow line to the main TB and filing a sundry for a new tank battery on the 187 well pad. We anticipate this new construction to begin in early spring.
