13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

BP suspected the casing collapsed on the tubing in the subject well. The tubing has been cut at 6316'. BP requests approval to abandon the Dakota completion by pumping a cement plug with calculated top of 6200'. This will give us ~64' of rat hole below our deepest Mesaverde perforation. We will tag the plug to confirm the top is at 6200' and will place an additional cement plug if necessary to bring cement to 6200'. After we successfully set the plug(s), BP plans to run tubing to produce the Mesaverde formation.

BP received verbal approval to proceed with the above work 5/31/2018 from the NMOCD and BLM.
