Re: 2018 Bradenhead Test  
Well: La Plata #2 , UL F Sec 30 Twn 32N Rge 13W, API # 30-045-21847

Dear Mr. Diamond,

The 2018 Bradenhead test on the above well indicates a failure. In order to comply with Rule 19.15.16.11, prevent waste and protect fresh water, you are hereby directed to submit a plan of action before **October 12, 2018**, and initiate remedial activity before **December 11, 2018**. The initial Surface Casing psi was 26. The initial Production Casing psi was 26. The five minute Surface Casing shut in pressure was 32. The well was shut in at the separator when we arrived. The production casing pressure and bradenhead pressure climbed while bradenhead was open indicating there is direct communication between bradenhead and production casing.

Wellbore schematic was received on location at time of test.

**Reference: RBDMS MPK1819357133 on future correspondence for this issue.**

**Notify the Aztec OCD 24 hours before work is initiated.**

If you have any questions, please call me at 505-334-6178, ext. 123.

Sincerely yours,

Monica Kuehling  
Deputy Oil and Gas Inspector  
District III - Aztec
