13. Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once Testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

As part of the NM "Pit Rule" 19.15.17.13 closure requirements, paragraph J. DJR Operating, LLC is required to notify the surface owner of plans to close a below grade tank (BGT). DJR is informing you of our plans to close the BGT on the above well pad that is located on BLM surface. Before DJR purchased this well, the BGT was closed by the previous operator and no official notice was given. This closure did not follow procedure and per the NMOCD we will need to use an auger to test the closed area. We plan to test the BGT area with an auger on **October 11th at 11 am.**
