Re: Inactivity - Tycksen No. 1
NE/4 Section 23 T29N R13W
API No. 30-045-08132

Dear Mr. Perrin:

Effective April 1, 2006, RM Energy, LLC purchased Locke-Taylor Drilling Co., the owner of the above referenced well. In going through the files, we just found a notice that this well last produced 2/2002 and as a result was on the inactive well list. We were aware that no production has been reported from this well when we purchased it; however, our due diligence found this well has never been shut-in and has been producing approximately 10 MCFD for many years. From conversations with Enterprise Products Partners, LLP and BP Amoco, we believe we will be able to account for this production. At this time, we are going through the process of change of ownership (i.e. state ownership C-145, bonding, division orders, etc.), and until we can show our ownership of the well, these two entities will not release the detailed information to us. As soon as we get the production information, we will file the required C-115's for the respective months. In the interim, we would ask your patients as we work through this process.

Should you have any questions, please feel free to contact the undersigned at the letterhead phone number.

Sincerely yours,

Paul C. Bertoglio
