13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Following recent upgrades at this site to install an electric driven injection pump, a final round of modifications will be implemented to ensure this site is capable of handling water from existing and proposed NEBU wells. This project consists of 3 main parts. First, install a new filter shed with additional filter pots. Second, the existing gas driven charge pump will be converted to electric drive. This will allow for automatic startup, increased reliability with electric motor, and allow for greater charge pump control via the PLC. Third, the existing header pipe for the tank battery is being replaced to ensure wall thickness is maintained. The new pipe will be heat traced and insulated.

See attached schematic.
