13. Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BLA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

San Juan Resources requests an additional 30 days to repair the Atencio #1 well (repairs completed by 10/31/2019). It is suspected that the wellhead seals are defective, and this will require procuring the replacement seals and repair parts. The operation will also require a workover rig to remove the tubing, set a retrievable bridge and test the well once the wellhead repairs have been made. The following procedure will be required to repair the well.

Move on location with rig, (ensure rig anchors have been adequately tested), spot tank & rig equipment. Bleed well down to 0 psi

Run in on sand line and set plug in 2-3/8" tubing. Nipple down wellhead, nipple up BOP's. Pick up 4-1/2", 10.5# J-55 (ID 4.052" Drift, Diameter 3.927") retrievable bridge plug (RBP) on 2-3/8" tubing, set RBP at 2,250'. Trip out of hole with tubing laying down. A19 Once wellhead is repaired and all seals are replaced bring wellhead back to location and reinstall wellhead. Rig Up pump truck to wellhead and perform Mechanical Integrity Test to 500 psi for 30 minutes, bleed well off, rig down & release pump truck. San Juan Resources will schedule MIT with the NMOCDD prior to MIT.
