(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The Rosa Unit #84 was recompleted in the MesaVerde in October 2002. Initially, that well produced 400-500 bpd of water and 50 mcf. Currently, the #84 is producing 160 bpd and 45 mcf. Williams proposes to continue to evaluate the Rosa #84 until April 2004 to determine if the Rosa #104 might also prove to be a viable recompletion candidate.

14. I hereby certify that the foregoing is true and correct.
