13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

BMG requests permission to temporarily abandon this well for potential future use as an injection well, then to deepen the well. Provided permission is given, BMG will do the following (steps 1-2 with workover rig, step 3 with no rig, steps 4-6 with drilling rig):

- 1) Pull the tubing and go back in the hole with a packer.
- 2) Set packer @ $\pm 1850'$ (end of $5\frac{1}{2}"$ casing @ 1910', open hole completion 1910-1958').
- 3) Pressure test casing to at least 550# for thirty minutes.
- 4) Pull TBG and packer.
- 5) Deepen the well $\pm 126'$ (new TD ± 2084) to expose all of the Niobrara interval.
- 6) Rerun TBG & packer with packer set at $\pm 1850'$.

Appropriate NMOC D personnel will be notified at least twenty four hours prior to testing. Appropriate permission will be obtained prior to initiating injection.
