Attn : Matt Halbert

This is to confirm the phone conversation that you had with Ken Jackson on 6/26/06 regarding the casing repair for the subject well (John Charles # 2 - 05-045-06480)

After an MIT a leak was discover in the casing of the subject well and was isolated between 228' - 260'.

Our current plan is to continue on with our fracture treatements and fix the leak at the end.

If injection can be established, POOH, perforated 4 holes somewhere between 228' and 260'. Set a CBP below 260'. Set a packer or retain above 228'. Cement (volume to be determined) thru perfs all the way to the surface.

A pit will be required. The pit will be 20'x30x6. The pit will be lined with a liner in accordance with the NMOCD regulations. A Sundry notification has been sent (6/23/06) to the state.

14. I hereby certify that the foregoing is true and correct.
