13. Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once Testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Black Hills Gas Resources intends to pull the tbg & set a RBP above all the existing perfs @ ~1100'. This temporary plug is required by the drilling contractor as a safety precaution prior to drilling the twin Dakota (Jicarilla 462-22 #22D) on the same wellpad. After the Dakota well has been drilled and cased, the RBP will be retrieved, the tbg run to the same depth, and production resumed. The anticipated drilling time for the Dakota well is 20-25 days.
