Re: McCord #11, K-09-30N-13W API 30-045-09643

Dear Sharon:

The 2006 Bradenhead test on the above well indicates a failure. In order to comply with Rule 108, to prevent waste and protect fresh water, you are hereby directed to initiate remedial activity before November 5, 2006. Bradenhead psi of 143, with 5 minute shut in of 117 psi was reported on August 2, 2006 witnessed by Monica Kuehling.

With your sundry please attach a copy of the last two tests, a current well bore schematic including formation and cement tops. Indicate the method used to determine the cement top; provide gas analysis from both the production and intermediate casing.

Reference RBDMS EHV0622751027 on future correspondence.

Notify the Aztec OCD 24 hours before work is initiated.

If you have any questions, please call me at 505-334-6178, ext. 17.

Sincerely yours,

Henry Villanueva

Oil & Gas Inspector District III
