☐ Water Shut off

☐ Conversion to Injection

13. Describe Proposed or Completed Operations

Questar Exploration request the following revisions to the approved February 26, 2003 Sundry Notice to P&A this well. A review of the well records report 125 sxs of cement slurry were circulated to the surface during the second stage cement job on October 29, 1995.

Therefore it is not necessary to perforate and squeeze cement outside the 4-1/2" casing at: 3842', 2350', 1892' and 464' as specified in the approved Sundry.

These changes were discussed with Steve Mason on July 15, 2003 and he concurred.

14. I hereby certify that the foregoing is true and correct.
