	<input type="checkbox"/> Dispose Water

(Note: Report results of multiple completion on Completion or Recompletion Report and Log form.)

13. Describe Proposed or completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Merrion Oil & Gas had proposed to plug and abandon the subject well due to lack of inflow after initial completion. The Hiccup A2R redrill was completed and it was not productive either. In preparing to P&A the subject well, we noted 100 psi on the casing. We propose to test the Hiccup A2 for two months to determine whether it is capable of economic production. If the test is successful, we will keep it on production and P&A the replacement well, Hiccup A2R within one month of completing the test. If the test fails, we will P&A the subject well and keep trying with the replacement well.

14. I hereby certify that the foregoing is true and correct
