After testing Surface casing as approved at 750 psi, Koch Exploration Company, LLC requests the following testing be completed for the 7", 23#, J-55, LT&C Casing before drilling out shoe based on anticipated downhole pressure of 600 psi. We will cleaning out the coal formation with air and mist and without taking into account the weight of air @ .22 psi/ft testing the casing to 1500 psi would be sufficient. We plan on testing the casing to 1500 psi. Cement was circulated to surface on the 7" casing.

I hereby certify that the foregoing is true and correct
