13. Describe Proposed or Compelled Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

We plan on testing Surface casing to 750 psi, Koch Exploration Company, LLC requests the following testing be completed for BOP's and Casing based on anticipated downhole pressure of a maximum of 600 psi. Well will be drilled with a minimum mud weight of 8.43 lbs/gal or .433 psi/ft, thus at TD of 2450' we would have approximate mud weight of +/- 1060 psi. We plan to test BOP's and Casing to 750 psi. Production casing For 4 1/2", 10.5# - anticipated maximum pressure of 600 psi will be encountered. Depth of casing will be set at +/- 2450'. We will test less than 70% of yield (3350 psi), so as not to exceed wellhead pressure rating of 3000 psi. We plan on testing production casing to 3000 psi.

I hereby certify that the foregoing is true and correct
