On 4/29/03 BP America requested approval to set surface casing to 350' due to a City of Farmington requirement. Approval was granted on 5/2/03.

The City requires surface casing be set 50' into bedrock, which actually is 250' instead of 350'. Therefore we request approval to change the 7" surface casing depth from 350' to 250'.

Cement will decrease from 120 sacks to about 75 sacks.

(The original drilling plan was approved by the NMOCD on 4/15/03 for a surface casing depth of 135')

Charlie Perrin gave verbal approval for above mentioned depth change on 7/23/03.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
