RE: Temporary Abandonment of COU #24 (J-8)

Gentlemen,

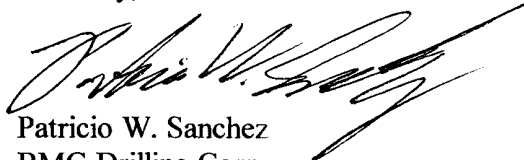

J - 8 - 25N - 1W
30-039-23556

BMG wishes to TA the above listed well located at 1650' Fsl, 1650' Fel, Section 8 T25N, R1W Rio Arriba County, New Mexico. The well has sufficient cement (see attached CBL/VDL) to protect the existing perms from correlative issues and also to isolate USDW's from contamination. We wish to retain the well-bore because we feel there could be up-hole potential in the Mesa Verde formation.

The upper most perforation at 6,870' will be isolated by the placement of a cement retainer at 6,850' and loading the casing with inhibited packer fluid and pressure testing the casing to 500 psig for 30 minutes. We would like to have the well TA'd by September 1, 2001.

Should you have any questions please call me or write to the letterhead information.

Sincerely,

Patricio W. Sanchez
BMG Drilling Corp.

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

- MIRU WSU. NUBOP.
- TIH w/ WS and CMT Retainer
- Set CMT. Retainer @+/- 6850' (See Attached Well Diagram)
- Load the hole with clean/inhibited packer fluid.
- Pressure test the casing to 500 psig for 30 minutes and Chart.
- POOH with WS. Top off casing with clean/inhibited packer fluid.
- NDBOP. Flange-up wellhead.
- RDMO WSU.
- As rules require file subsequent Report within required time. (30 days of completion)
- Work to begin no earlier than approval date from regulatory authority.

14. I hereby certify that the foregoing is true and correct
